

Using Microsoft Productivity Applications – Works Suite 2004 or Word

Your PC may include Microsoft® Productivity application software (Works Suite 2004 or Word). These software programs may not be preinstalled on your PC, and may require installation from the Microsoft DVD or set of CDs that are included with your PC.

Microsoft Certificate of Authenticity

When you install or reinstall software programs from the Microsoft DVD or set of CDs, you need to supply the Certificate of Authenticity code or Product Key. This code is found on the Microsoft Certificate of Authenticity label with the software program instructions, usually on the disc packaging.
